Secure payments Previously, the admin part of a web application has tended to be built solely for functionality, with not much, if any at all, taking into account its design. Thankfully things change. Powerful functionality and beautiful design, especially in recent years, have come together nicely. And with the massive increase in popularity of Bootstrap frame, creating a beautiful and functional admin panel has never been easier. Why should choose to use Bootstrap at all? With Bootstrap, you know exactly what you're getting. It's relatively easy to customize the mobile-first frame that incorporates ready-made design patterns and comes packed with a huge library of components and widgets. And perhaps more importantly, your Bootstrap build will look consistently across all screen resolution and platforms. So it makes sense to build the dashboard, or admin panel of your web application with something that you know works well. All of the free Bootstrap admin and dashboard themes below have been built to be used as a complete solution so you can quickly create the front dashboard in your web app. In addition to all of Bootstrap's handy collection of widgets, they all contain many extra addons, plugins and features (plugins for charts & graphs, calendars, file managers, and so much more). Everything you'll ever need to build dashboards. And on top of all these features, these themes are all gorgeous too. Here they are: Vibe – Free Bootstrap 4 Dashboard Template (Free) This dashboard was built with React.js and offers a clean interface and plenty of UI elements to help you create a beautiful admin dashboard.
